

Creating Adobe Acrobat PDF Files

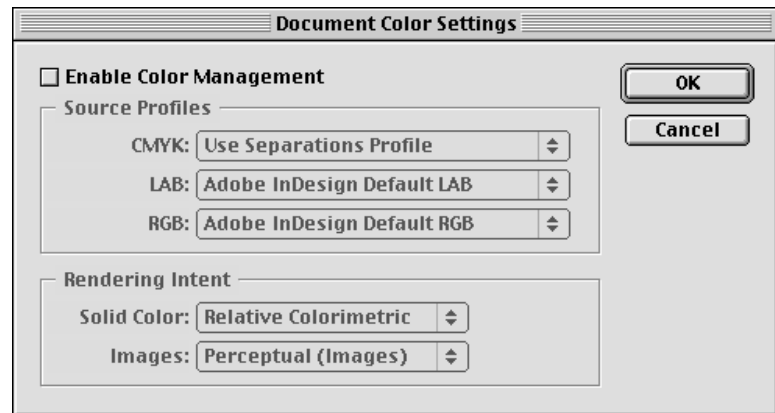

Adobe InDesign 1.5 with MacOS 9.2.2

BEFORE YOU BEGIN: Make sure Acrobat Distiller is set up properly and that you've installed the required PPD and printer driver. You'll find instructions for doing this in "Acrobat Setup for OS 9.2.2."

STEP 1

Open your document, choose Edit → Color Settings → Application Color Settings.

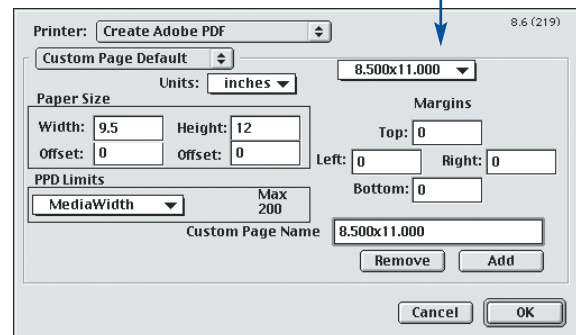

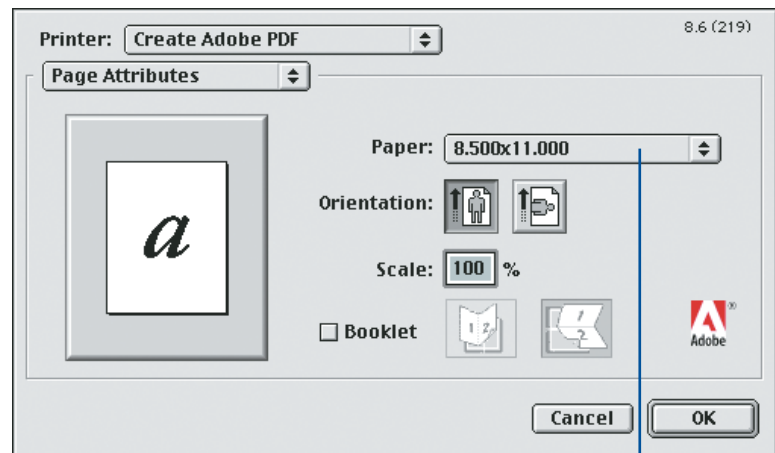

Ensure that Enable Color Management is not checked. Click OK.

STEP 2

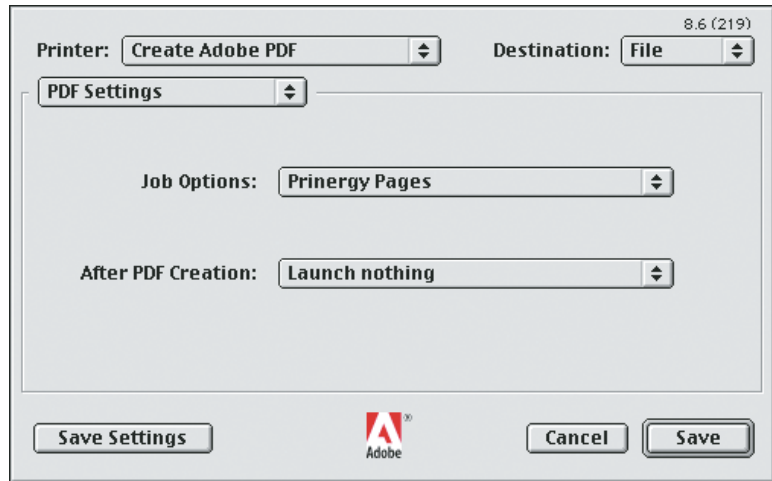

Choose File → Page Setup, and change your settings to match the illustration.

Use the Paper pop-up menu to set a custom page size with a width and height one inch greater than your document's width and height.

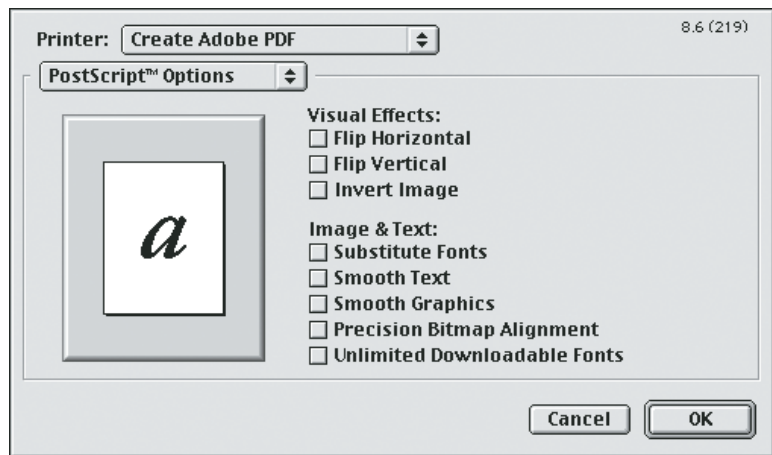

STEP 3

Choose PDF Settings from the pop-up menu and change your settings to match the illustration.

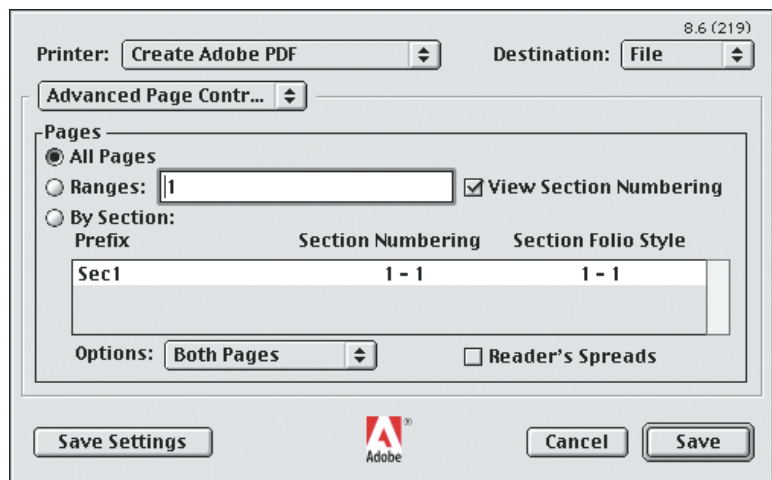

STEP 4

Choose PostScript Options from the pop-up menu and uncheck all options. Then click OK.

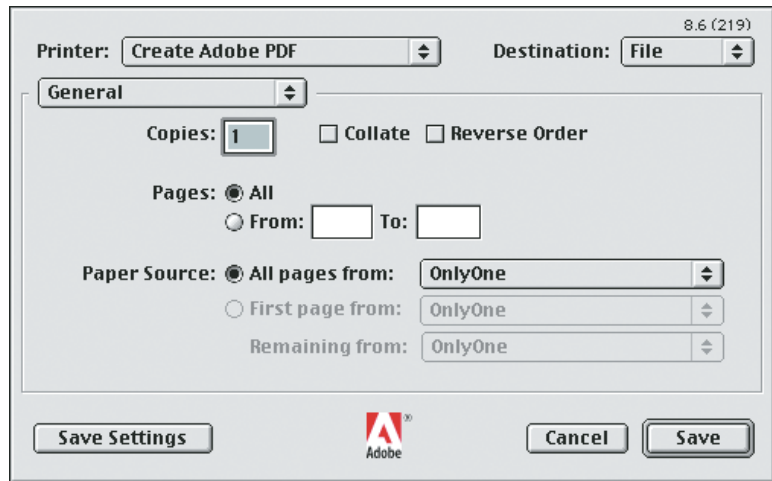

STEP 5

Choose File → Print, and change your settings to match the illustration.

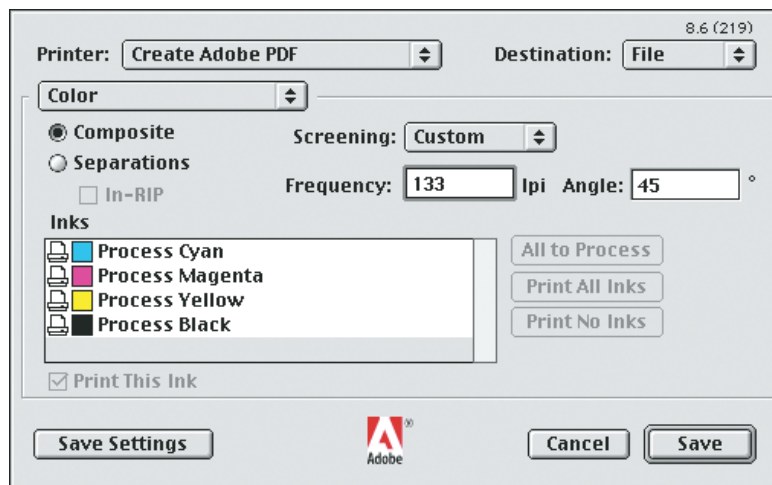

STEP 6

Choose General from the pop-up menu and change your settings to match the illustration.

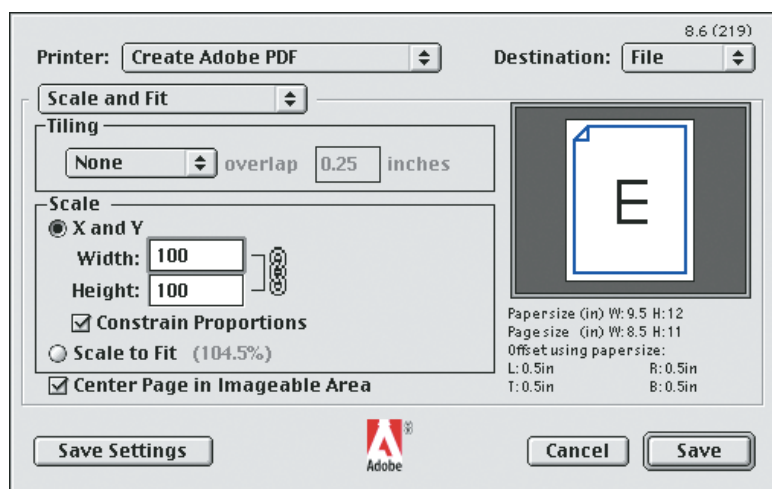

STEP 7

Choose Color from the pop-up menu and change your settings to match the illustration.

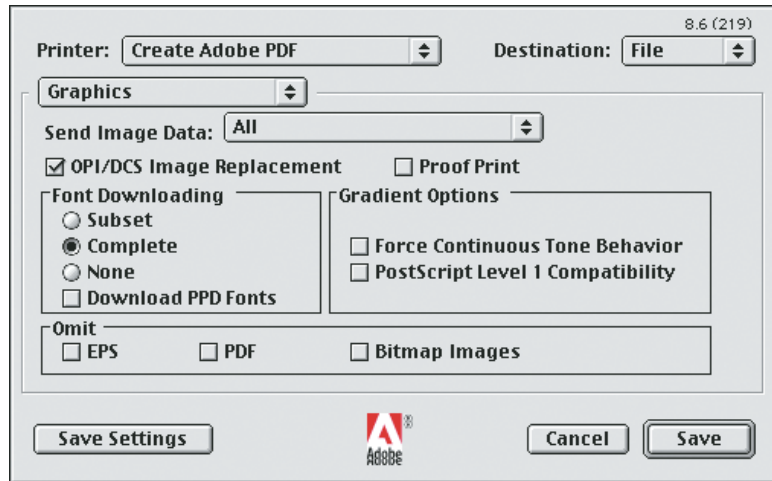

STEP 8

Choose Scale and Fit from the pop-up menu and change your settings to match the illustration.

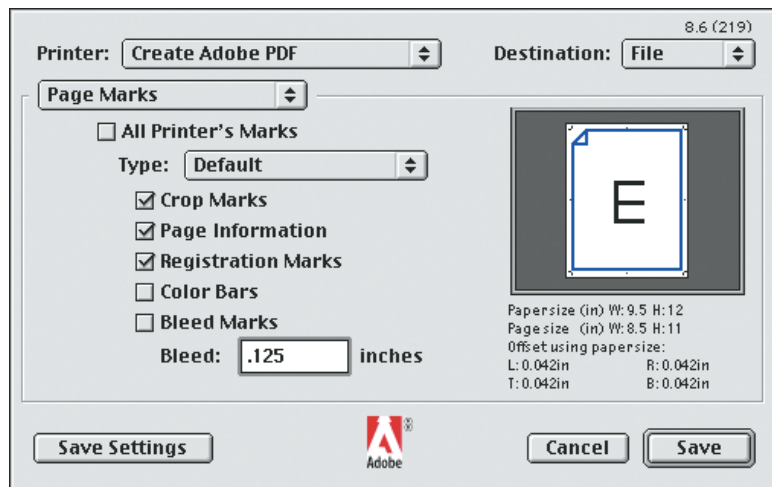

STEP 9

Choose Graphics from the pop-up menu and change your settings to match the illustration.

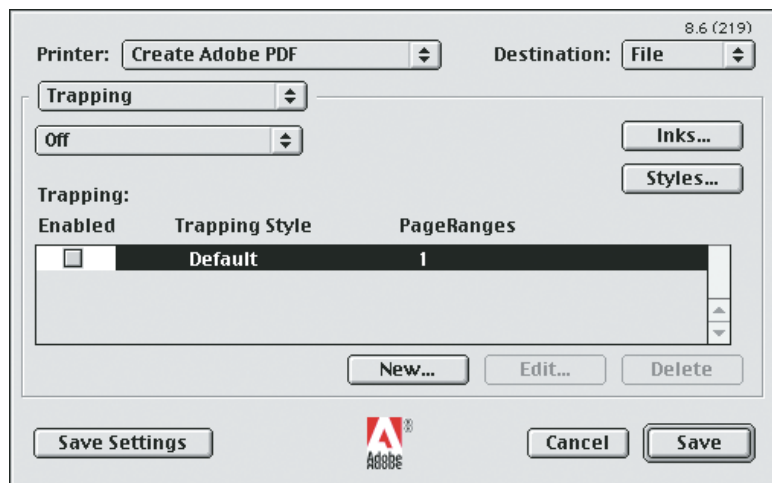

STEP 10

Choose Page Marks from the pop-up menu and change your settings to match the illustration.

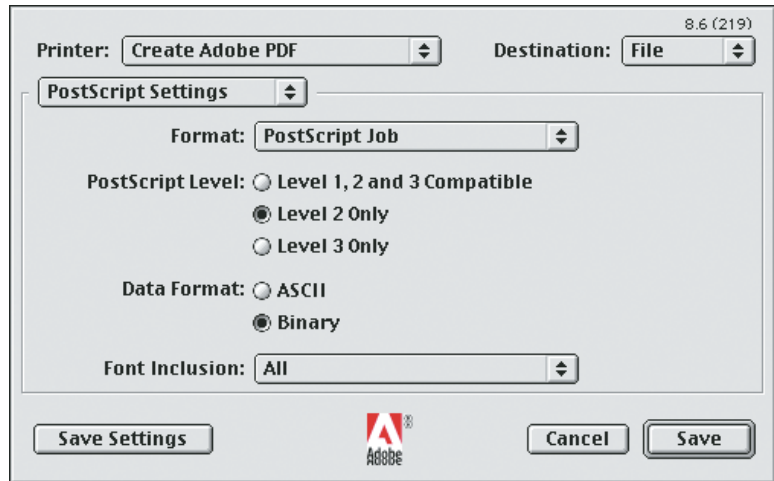

STEP 11

Choose Trapping from the pop-up menu and change your settings to match the illustration.

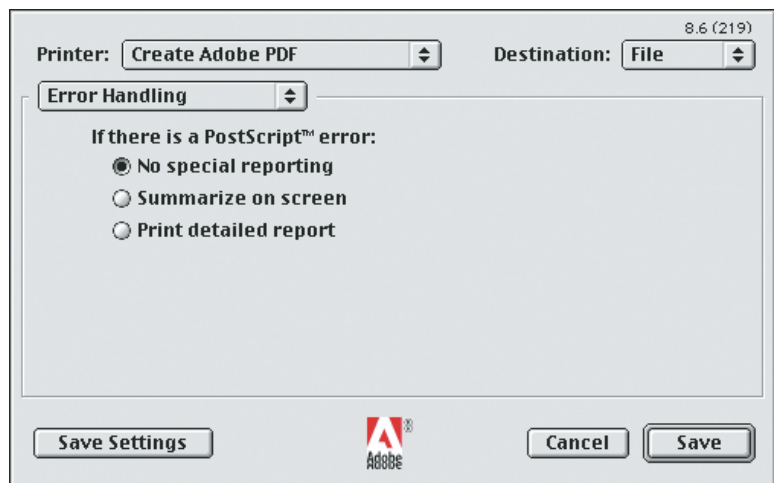

STEP 12

Choose PostScript Settings from the pop-up menu and change your settings to match the illustration.

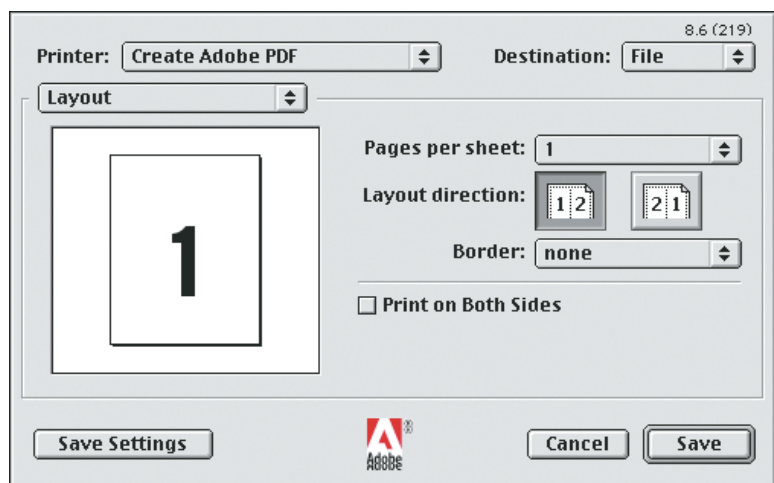

STEP 13

Choose Error Handling from the pop-up menu and change your settings to match the illustration.

STEP 14

Choose Layout from the pop-up menu and change your settings to match the illustration.

STEP 15

Choose Printer Specific Options from the pop-up menu and change your settings to match the illustration. Then click Save.

When you click Distill, a temporary PostScript file is created. Acrobat Distiller automatically launches and converts the PostScript file into a PDF file, and then quits. The PDF file is then opened in Acrobat.
